

ONION and SHALLOT SET CARE

As soon as they arrive I empty the sacks of onion and shallot sets and lay them out on my floor to dry and air them. I then check them carefully as I bag them up to remove any in poor condition.

But once you get them home/ to your shed, you will need to look after your sets. **Please do not leave them in the paper bag.**

Lay them out on a seed tray and put them somewhere cool and dry where the air can get round them. Keep checking they are in good condition.
